Profile

Full-stack developer with 3.5+ years in a B2B SaaS start-up, building in TypeScript across Node.js/NestJS, React/Next.js and PostgreSQL/Prisma. Owned the Ecopassport widget end to end: a multi-tenant, server-rendered product sheet embedded on major e-commerce sites and validated with JMeter load campaigns (52,509 requests, 0 errors). Proposed and led a 30,000-line refactoring and the migrations to TypeScript, NestJS and an Nx monorepo. Backend and architecture focus, a testing and code-review habit, and experience shipping to production in a small team. Available October 2026, open to roles in France or abroad.

Professional Experience

Full Stack Developer (apprenticeship) Jan 2023 - Present
Holis · Paris, France

B2B SaaS for life-cycle assessment and eco-design. Joined as the 4th employee two months after founding; the company is now about 20 people with a tech team of 7.

- Owned the Ecopassport widget end to end: multi-tenant Node/Express + TypeScript server, PostgreSQL/Prisma, React server-side rendering and a 16 KB dependency-free client script, so regulatory updates deploy centrally to every client site; 14 business modules covering 17 product categories, live at major e-commerce retailers
- Validate every widget release with JMeter load campaigns and deliver the metrics to clients: latest run 100 virtual users, 52,509 requests, 0 errors, p95 1.29 s; replaced a planned Redis cache with a client-side singleton optimisation
- Proposed and led a 30,000+ line refactoring, then the migrations to TypeScript, NestJS and an Nx monorepo; the codebase is now about 250,000 lines of TypeScript with 91 data models
- Built the bilingual FR/EN LCA report generator: user-composed Word reports from editable templates (docx-templates plus programmatic table injection), charts rendered server-side with Chart.js on node-canvas
- Co-developed the supporting-document feature (linking form, computed expiry lifecycle, archiving, Azure Blob signed URLs) and built the calculation engine's non-regression test suite
- Current: moving DTOs and validators into a shared monorepo library so front and back share one validation and security layer

Web Integrator / Web Content Writer (internship) 2021
Team Tonic Services · Gagny, France

- Integrated web pages and wrote site content for a small services company

Skills

Backend

Node.js, NestJS, Express, TypeScript, REST API design, Socket.io real-time, OAuth / JWT / OTP authentication, port-and-adaptor integrations (Stripe Identity, Twilio, Mailgun, Cloudinary)

Frontend

React, Next.js (App Router, PWA), server-side rendering, react-query, zod + react-hook-form, SCSS modules, embeddable vanilla JS widgets

Data

PostgreSQL, Prisma (91-model schema), PostGIS, MySQL, MongoDB, migrations and seeding

Quality and delivery

JMeter load testing, Jest unit and e2e, Playwright, non-regression suites, code review, GitHub Actions CI, Docker, Azure App Service and Blob Storage, Nx monorepo

Domain

B2B SaaS, life-cycle assessment and eco-design, AGECE environmental labelling, server-side Word report and chart generation, marketplaces and KYC trust flows; agentic coding with Claude Code

Also used

PHP/Symfony, React Native, Python, Flutter, Haskell (coursework)

Education

Architecte de Systèmes d'Information (RNCP38114, master level), in progress

2025 - 2026 · ETNA, Ivry-sur-Seine

Thesis: industrialising the restitution of life-cycle-assessment data to heterogeneous audiences without compromising compliance or maintainability. Expected October 2026.

Concepteur Développeur d'Applications (RNCP, bac+3)

2023 - 2025 · ETNA, Ivry-sur-Seine

Application design and development, 780 h; exams, project defence and written report.

Web@cadémie (RNCP level 5, bac+2)

2021 - 2023 · Epitech, Paris

PHP/Symfony, JavaScript/React, Node.js, SQL/NoSQL, agile group projects.

Courier and retail roles alongside studies

2020 - 2022

Just Eat Takeaway.com, Leader Price · Paris, France

- Food-delivery courier (2021-2022) and shelf-stocking assistant (2020) alongside studies

Projects

GPConnect, *ETNA final project, built solo end to end, in production (2025-2026)*

Parcel-delivery marketplace between France and West Africa with trust built into the flow: Stripe Identity KYC before a carrier can accept a parcel, OTP hand-over and delivery proofs, real-time chat, mutual ratings, arbitrated disputes. Passwordless OTP and OAuth (Google, Apple, Facebook) login, RS256 JWT in httpOnly cookies, CSRF guard, AdminJS back-office, Swagger, Jest and Playwright tests. github.com/Cheikhna-sakho

Stack: Next.js 14 PWA, NestJS 10, Prisma 5, PostgreSQL 16 + PostGIS, Socket.io, Docker

MyLittleAnsible, *ETNA project (2025)*

Ansible-style infrastructure-as-code CLI applying YAML-defined tasks to Debian hosts over SSH from an inventory file.

Stack: Python, SSH, YAML

Monet Maker, *ETNA project (2025)*

Agent that turns an image into a painting: contour extraction, animated sketch drawing, then colourisation; packaged with Docker.

Stack: Python, OpenCV, Docker

Languages

French (native) · English (B2: daily written and technical use, conversational spoken)
